

STATE OF NEW YORK  
PUBLIC SERVICE COMMISSION

CASE 17-E-0057 - Petition of National Grid Port Jefferson Energy Center, LLC and National Grid Glenwood Energy Center LLC for Amendments to their Certificates of Public Convenience and Necessity and Order Confirming Lightened Regulation.

NOTICE OF PUBLIC STATEMENT HEARINGS

(Issued February 28, 2017)

**TAKE NOTICE** that the New York State Public Service Commission ("Commission") will hold public statement hearings before an administrative law judge concerning the requests of National Grid Port Jefferson Energy Center, LLC and National Grid Glenwood Energy Center LLC (collectively, "Petitioners") for amendments to their certificates of public convenience and necessity. Those certificates, granted in 2001, authorized construction and operation of those electric generation facilities subject to a maximum 79.9 megawatt (MW) generation output for each facility. Petitioners now propose that the 79.9 MW output caps be eliminated, thereby allowing each facility to generate up to its full 94 MW net-to-grid capacity for delivery into the Long Island Power Authority's electric system.

Petitioners state that the proposed changes would result in more efficient operation of the facilities, displacement of less efficient resources and minimization of any existing operational concerns. They note, in addition, that the Long Island Power Authority requested that Petitioners seek approval to raise the facilities' output limitations.

The Commission's goal is to obtain public feedback on Petitioners' proposals. The public statement hearings will be held as follows:
